

2 Gallon (US) Kits

10 Gallon (US) Kits

Developed to fill/repair concrete floor surface imperfections such as air holes, popouts, surface pitting, scratches and gouges, etc.

- Available in 8 colors to best camouflage floor surface pitting and surface imperfections.
- Rapid-set formula allows for quick access to floor areas and grinding as early as 1 hour after application (@70°F).
- Low viscosity allows for penetration into very small surface pits and imperfections.
- Yields a smoother, denser floor surface.
- Economical, hand mix formula.

SRG is a low viscosity structural polyurea manufactured in a neutral base color. Through the use of color packs, product color can be chosen on the jobsite to best match the concrete floor. Eight standard base colors are available and are designed to match floor colors most commonly found on stained/polished concrete floor projects.
